If you have any questions or need any help then please contact our sales office.

Designed specifically for sealed lead acid batteries, microprocessor control ensures correct management of the charging voltage and current.

Fault monitoring outputs are provided for remote signalling, together with LED indications on the enclosure door. Can be used for continuous load applications, such as Smoke Dispersal Systems. Load relays, with changeover contacts, are standard equipment.

Technical Specification

Designed to EN54 Part 4
For fire alarm or stand alone use
Solid construction
Proven reliability

Constant voltage charging
Visual and audible fault warnings
Space for batteries
Suitable for sealed lead acid batteries

Supplied with double pole relay outputs for smoke dispersal or bell booster use
Fault relay output

Related Products

Stand Alone Gas Detector

Landon Kingsway's Stand Alone Gas Detectors are available as single or multi channel, both come with sensors.

LKGSP4 Gas Safety Panel

The LKGSP4 is capable of detecting the presence of targeted gases; Natural gas, Carbon Monoxide or Liquid Petroleum.

GDP2 Gas Detection Panel

GDP2 can be used as a single or two zone gas detection and shut off system.

Severlek Emergency Buttons

The Severlek emergency button has a variety of uses where it is required to have a latching push button switch to sound an alarm or de-activate equipment.
