

## Dry Riser Inlet Cabinet & System

The Dry Riser Inlet Cabinet and system is normally a dry unit that is charged by the fire brigade in the event of an emergency. An inlet breeching at ground level provides the connection to the water supply.

Breeching inlets have either 2 or 4 inlet connections complete with 2.5" male instantaneous inlets to BS336 fitted with non-return valves, 1" drain valve and caps and chains.

A 100mm (4") rising main uses a 2-way inlet breeching in a vertical or horizontal position. A 150mm (6") rising main uses a 4-Way inlet breeching. Inlet Breechings comply with the requirements of BS 5041 Part 3.

The Breechings are normally housed in inlet cabinets, normally recessed into the external wall of the building in a vertical or horizontal position, 4 -way breechings in a square inlet breeching cabinet, manufactured in accordance with BS 5041 Part 5.

Cabinets for foam inlets are available on request.

Recommended mounting 750mm from floor to valve centre.

If you have any questions or need any help then please contact our sales office.

### 16SWG Zintec Steel

<b>Part Number</b>	10905502 Dry Riser Inlet Vertical
<b>Material</b>	16SWG Zintec Steel
<b>Finish</b>	RED RAL3002
<b>Box Dimensions</b>	395(Wide) x 595(High) x 295(Deep) mm
<b>Minimum Aperture</b>	395(Wide) x 595(High) X 295(Deep) mm

### 16SWG Stainless Steel

<b>Part Number</b>	10905506 Dry Riser Inlet Vertical
<b>Material</b>	16SWG Stainless Steel
<b>Finish</b>	Satin Polished
<b>Box Dimensions</b>	395(Wide) x 595(High) x 295(Deep) mm
<b>Minimum Aperture</b>	395(Wide) x 595(High) X 295(Deep) mm
