

LANDON KINGSWAY

SAFETY, CONTROL & ENERGY MANAGEMENT

Fire Control Panel

The Solenoid Quick Release Mechanism MKI is designed to provide a simple electro-mechanical release mechanism for gravity-operated devices such as the Landon Kingsway free fall fire valve.

It can be connected to various sensors such as panic buttons, electro-thermal links and gas detectors using a simple loop wiring system. The panel provides a normally on power outlet to control fire valves, boilers and a normally off power supply to the alarm(s).

In addition, a spare set of changeover volt free contacts is provided for connection to BMS or other.

Available Models

- Fire Control Panel FCP 2002 230v AC
- Fire Control Panel FCP 2002 24v DC
