Landon Kingsway fuel fill point top entry cabinets have been designed for filling fuel storage tanks. A double locking feature limits access to authorised personnel only. Tank levels can be read without accessing the cabinet through a polycarbonate window.

The Fuel Fillpoint Cabinet is fitted with an isolation valve & non-return valve that is connected from a top coupling.

Cabinet Construction

The entire cabinet is constructed from 16 SWG Zintec steel then powder coated grey. A shatter proof polycarbonate viewing window is provided as standard for easy reading. Contents gauges, Tank High, level and bund alarms are supplied as an extra. The door is completely weather sealed.
