

Battery Operated Tank Alarm

The battery-operated tank high level alarm provides an audible indication of when the filling level of the tank has been reached this avoids an overflow situation. This tank alarm is ideal for use on portable installations or when mains power is unavailable.

- 72 hours battery life when in full alarm mode
- Suitable for unmanned sites.
- Test and alarm mute functions
- Weather proof enclosure.
- 5m probe
- Fittings for plastic or steel tanks

This alarm comes with three cut to size labels for you to select and adhere next to the LED, for making it clear to the user what the alarm siren is indicating. There are two labelled high and low, and one that is blank in case you wish to name it something else with permanent marker.
