

10904101 - 2 1/2 BSP TO INSTANTANEOUS BS336 MALE

The 2 1/2" BSP x Instantaneous Inlet to BS336 is a robust adaptor designed to provide a reliable connection between standard 2 1/2" BSP threaded pipework and BS336 instantaneous fire service hose couplings. Manufactured from high-quality gunmetal, this fitting offers excellent corrosion resistance, durability, and long service life, making it suitable for demanding fire protection and water transfer applications.

Commonly used on dry riser, wet riser, fire hydrant, foam inlets and industrial water systems, the adaptor enables rapid hose connection and disconnection while maintaining a secure, leak-tight interface. The gunmetal construction provides superior resistance to atmospheric corrosion and is well suited to both indoor and outdoor installations.

Features

- 2 1/2" BSP threaded connection.
- BS336 instantaneous inlet connection.
- Manufactured from high-quality gunmetal.
- Excellent corrosion resistance and mechanical strength.
- Suitable for fire protection and water distribution systems.
- Durable construction for long service life.
- Provides quick and secure hose connection.
- Compatible with standard BS336 fire brigade equipment.

Applications

- Dry riser systems.
- Wet riser systems.
- Foam Spreading Systems.
- Fire hydrant installations.
- Fire brigade access points.
- Industrial and commercial water distribution systems.
- Emergency water supply connections.

Material

- Body: Gunmetal

Standards

- Instantaneous connection manufactured in accordance with BS336.

Part Number	Description	Type	Connection BS336
10904101	Foam Adaptor	Flanged PN16	2 1/2"
